

MULTI|VIS MEETING

THE POWER OF COLLABORATION IN CORPORATE ENVIRONMENTS

MEETING ROOM UNIFIED SOLUTION

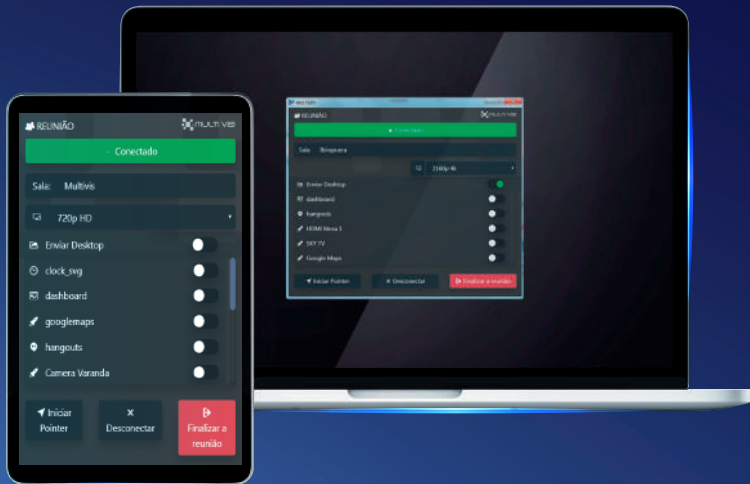

The pandemic of COVID-19 changed workers behavior all around the world, security protocols were adopted and decisions were made for the well-being and safety of the employees. Remote collaboration is a hard task if there are no proper tools to manage it.

On the other hand working at home can be a challenging experience: worries about noise around the computer, low image quality, slow connection, lack of privacy, and many other unpleasant situations.

Following all the safety protocols, companies chose to operate in a hybrid environment, where the employees can choose days to go to the office, maintaining the connection between their colleagues and boosting the energy for new collaborations.

MultiVis Meeting is the Unified Visual Solution that simplifies the way local meetings and videoconferences runs. The solution features wireless screen-sharing, one-click video conferencing, dashboards, and remote multi mouse control, all on the same screen and with automatic content adjustment.

SIMPLE INSTALLATION AND EASY OPERATION

iOS and Android mobile devices integration

Multiplatform user interface

Integration with tablets and iPads

One touch start meeting

Access by Token

COMPATIBLE WITH:

MICROSOFT TEAMS

GOOGLE MEET

CISCO
